GRAND CENTRAL DAMAGE SUIT

Set for Nov. 18th—A Jury to Act in Advisory Way.

RICH IN LOWER MAMMOTH.

Supt. Ball Begins in Fine Samples of Ore—Annual Report of a Rich Mine—Notes.

The attorneys for the Grand Central Mammoth damage suit returned from Nephel last evening after attending court convened by Judge Marionaux to set the calendar for the term. When the Grand Central-Mammoth trial case was called, the question of the eligibility of the judge to try the case, was raised by the plaintiff's attorneys. On the motion being overruled Judge Marionaux announced that he proposed having a jury to act in an advisory way. Col. Pickett, one of the attorneys for the Mammoth, said today that while the practice is unusual, it is a well established principle of jurisprudence to call a jury to act in an advisory way to the conscience of the court. This jury will only judge as to matters of fact.

The motion for a change of venue was opposed by the plaintiff's attorneys. It was held that Judge Marionaux was not disqualified from sitting on the case, and it was his duty to do so.

In disposing of the matter the court stated that he had not the remotest knowledge about the merits of the case.

In deciding the motion for a new trial he had not gone beyond the question upon which that motion was decided. He decided to try the case himself, which was not objected to by Judge Dickson for the plaintiff, when the court announced that a jury would be called. The trial was set for November 18.

LOWER MAMMOTH STRIKE.

A Big Body of High Grade Silver Ore on 1,000 Level.

Superintendent Ball of the Lower Mammoth came in from the mine this morning with a grip full of rich samples taken from the 1,000 level, which was not objected to by Judge Dickson for the plaintiff, when the court announced that a jury would be called. The trial was set for November 18.

HOMESTAKE REPORT.

Interesting Details Regarding the World's Greatest Gold Mine.

An eastern exchange says the annual report of the Homestake Mining company, of South Dakota, has just been received by the stockholders. It covers the year previous to May 31, 1901. The Homestake is the greatest gold mine in the world and some of the details of the report will have local interest. It has paid 275 dividends without a miss in the past twenty-three years. The report states that the total output of the mine was 352,385 ounces of gold, valued at \$2,585,847.17. The company produced 352,385 ounces of gold, valued at \$2,585,847.17.
